Capitalising on:

- Algorithmic trading
- Quantitative/Price prediction models
- AI/Machine learning
- Market microstructure

We are ambitious and excited about the future

We believe the past 20 years of financial market disruption is only the beginning. The next decade will be even more disruptive, and we welcome that. We have the ambition, technology and expertise to play an active role in the development of markets and a healthy market ecosystem. Deep curiosity and a thirst to innovate is part of our DNA.
